SUSTAINABILITY

PANEL PLUS NET ZERO 2050

GO GREEN TOGETHER

Panel Plus, under the management of Mitr Phol Group, has operated sustainably since its establishment in 1990, evolving into a principle that drives the company forward with a commitment to social and environmental responsibility. The company continuously develops and improves to provide society with premium wood-substitute products.

Goals and Commitment

Panel Plus has set ambitious targets to become a carbon-neutral organization by 2030 and achieve net-zero greenhouse gas emissions by 2050. In 2023, Panel Plus managed to reduce CO2 emissions from its entire production process by 69,345 tons per year, equivalent to planting over 4.6 million rubber trees. These commitments reflect the company's dedication to minimizing environmental impact and contributing to global sustainability.

OUR STRATEGIES FOR SUSTAINABILITY

We are committed to creating highly durable products with long lifespans to reduce unnecessary replacements and usage. We support and develop reforestation projects that help absorb and reduce CO2 emissions from our production processes by planting fast-growing trees such as eucalyptus and acacia. These efforts aim to increase green areas and capture CO2 across over 400 acres per year.

TECHNICAL DATA

Properties	Determination of Properties	Unit (Max or Min)	Panel Plus Typical Value	EN 438
Thickness	Variation	mm	0.8	0.5<N≤1
Tolerance		mm	±0.1	±0.1
Resistance to surface wear	Wear Resistance	Revolutions (min.)	500-900	350
Resistance to scratching	Force	Rating (min.)	3	2
Resistance to impact by large diameter ball	"Height Indent diameter"	"mm (min.)"	800	800
		mm (max.)"	10	<10
Resistance to dry heat (180 C)	Appearance	Gloss finish	Slight defect	Moderate defect
		Other finishes	No visible defect	Slight defect
Resistance to Immersion in Boiling Water	Appearance	Rating (min.)		
		Gloss finish	4	3
		Other finishes	5	4
Resistance to cigarette burns	Appearance	Rating (min.)	Slight defect	Moderate defect
Resistance to cracking	Appearance	Rating (min.)	No defect	Slight defect
Resistance to steam	Appearance	Rating (min.)	No defect	Slight defect
Resistance to staining	Appearance	Rating (min.)		
		Group 1&2	No defect	No defect
		Group 3	Slight defect	Slight defect

ANTI-BACTERIAL +

Anti-bacterial high pressure laminate (HPL) is specialized to inhibit the growth and spread of bacteria. This advanced material is ideal for settings where hygiene is critical, such as hospitals, laboratories, food preparation areas, and public facilities.

Care Guide

Our laminates are easy to clean:

- Ensure the storage area is dry and well-ventilated and avoid extreme temperature.
 - Protect HPL from direct sunlight by using curtains or blinds.
 - Use a damp clothes with a mild detergent or dish soap for cleaning HPL surface.
 - Avoid using abrasive cleaners or scouring pads.
 - Refrain from using sharp tools or objects the surface.
-

Storage and Installation Guidelines

• Humidity

Avoid storing in areas prone to high humidity or drastic temperature changes, such as garages or basements without climate control.

• Packaging

Keep HPL in its original packaging until you are ready to install it. The packaging helps protect the planks from damage, dust, and moisture.

• Placement

Store the boxes flat and level. Avoid stacking too high to prevent crushing the boxes at the bottom.

• Tools and Equipment

Use appropriate tools for cutting and installing laminate flooring to avoid chipping or damaging the edges.
